

Enterprise Grid Backup Service

DVH is proud to announce yet another special service for our valued customers. This provides the DVH hosted websites the ultimate disaster recovery capabilities for **FREE**. This Enterprise grade backup service makes DVH the safest webhost in the world!

Description

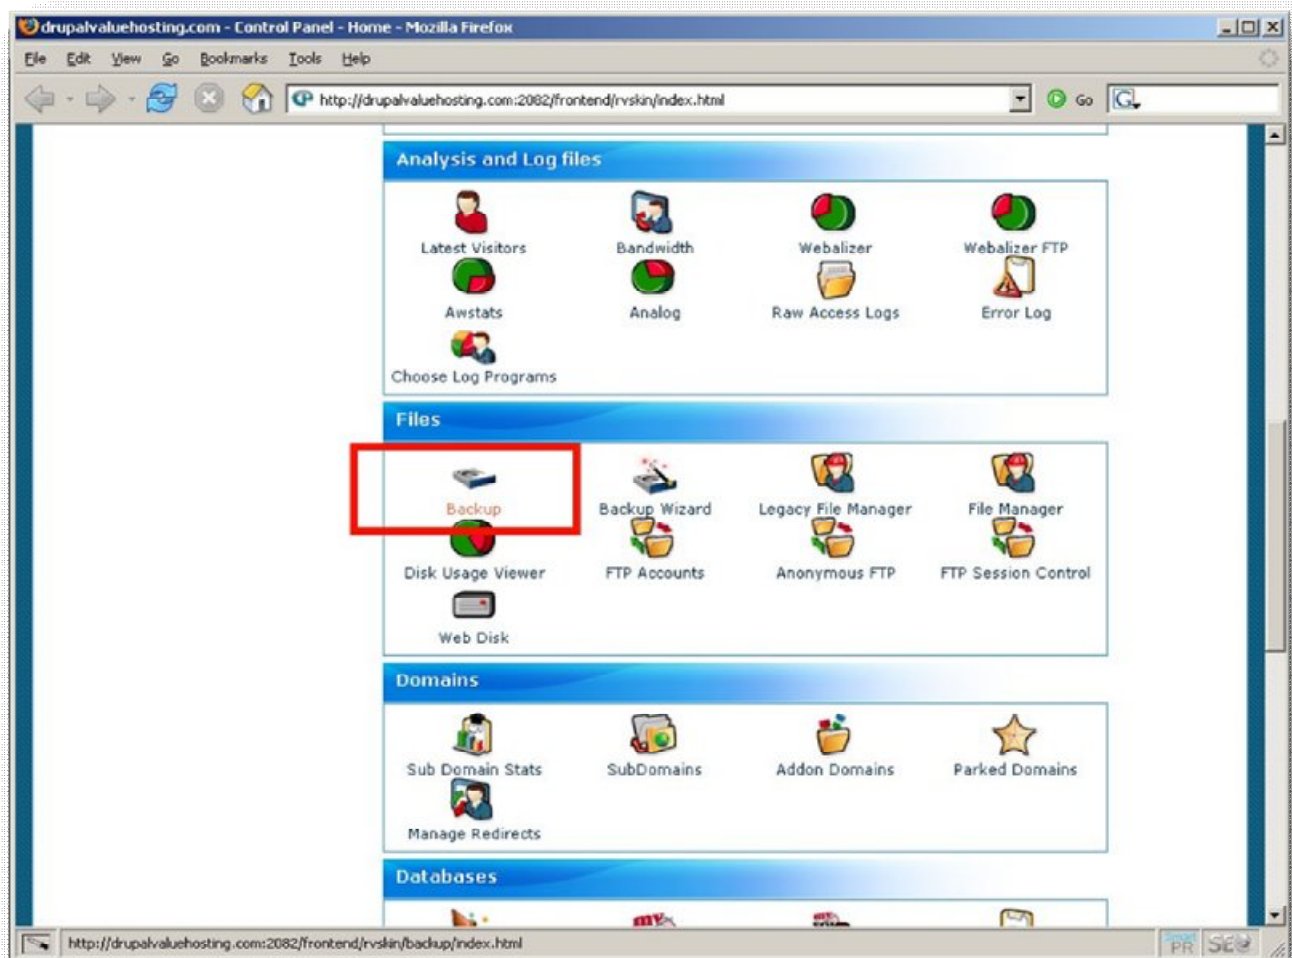

Now all customers at DVH have the free option of utilizing the Enterprise Grid Backup service. This provides total backup of your website, MYSQL databases, Email accounts, subdomains, addon domains, ftp accounts and any customization at DVH account. This backup file is then simultaneously stored in both our Data Centers at Dallas and Seattle, both on RAID 5 Disc Arrays! Thus safe guarding your website and full recovery capability in case of any emergency.

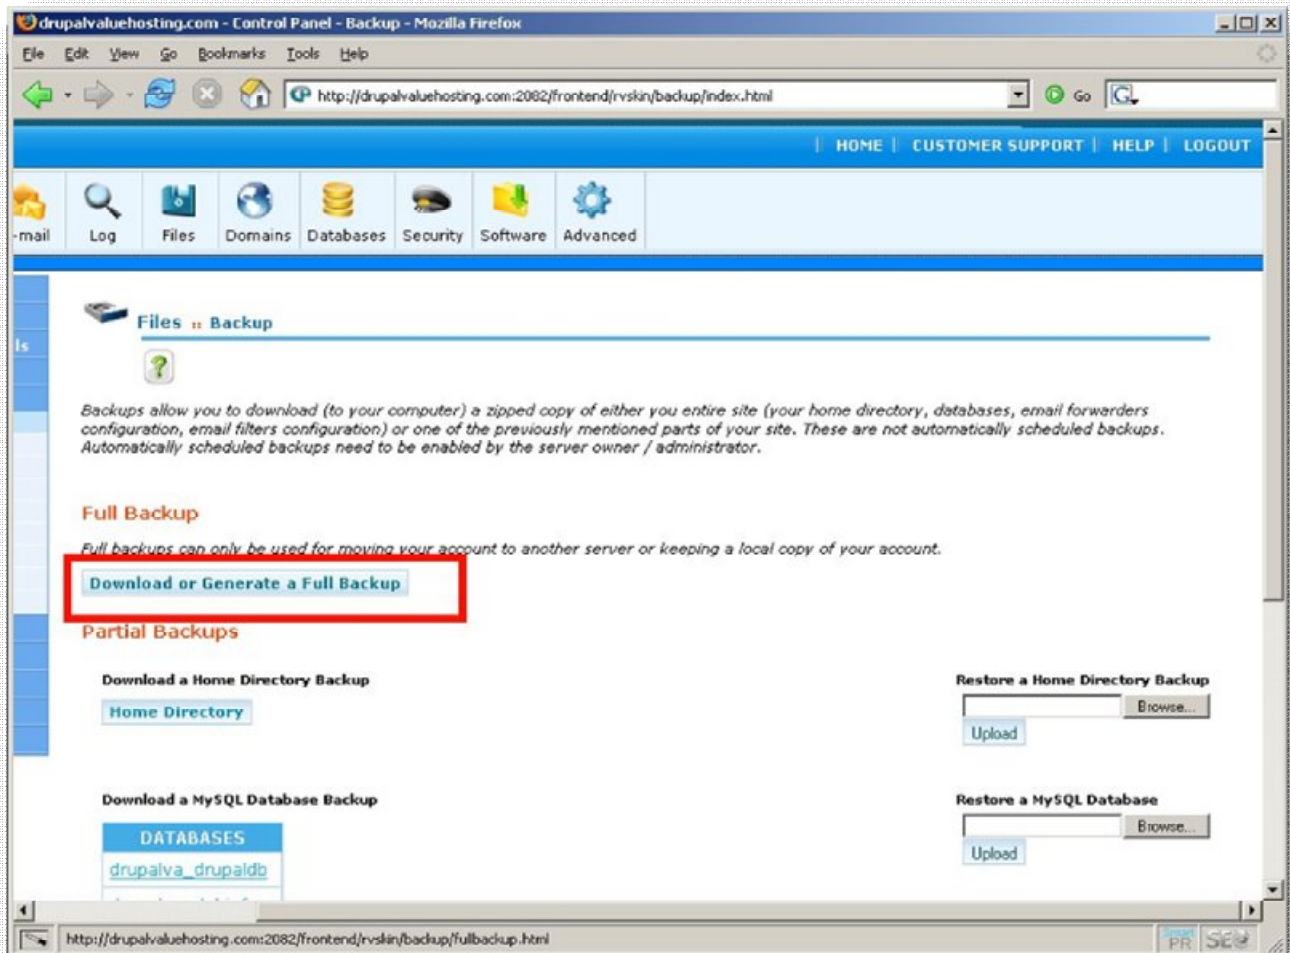

The usage of the Enterprise Grid Backup is very simple and it has been integrated with the Cpanel provided with your hosting account. The following screenshots show how easy it is to utilize this unique feature at DrupalValueHosting!

How it Works!

Step 1: Login to your Cpanel >> Click on “Backup”

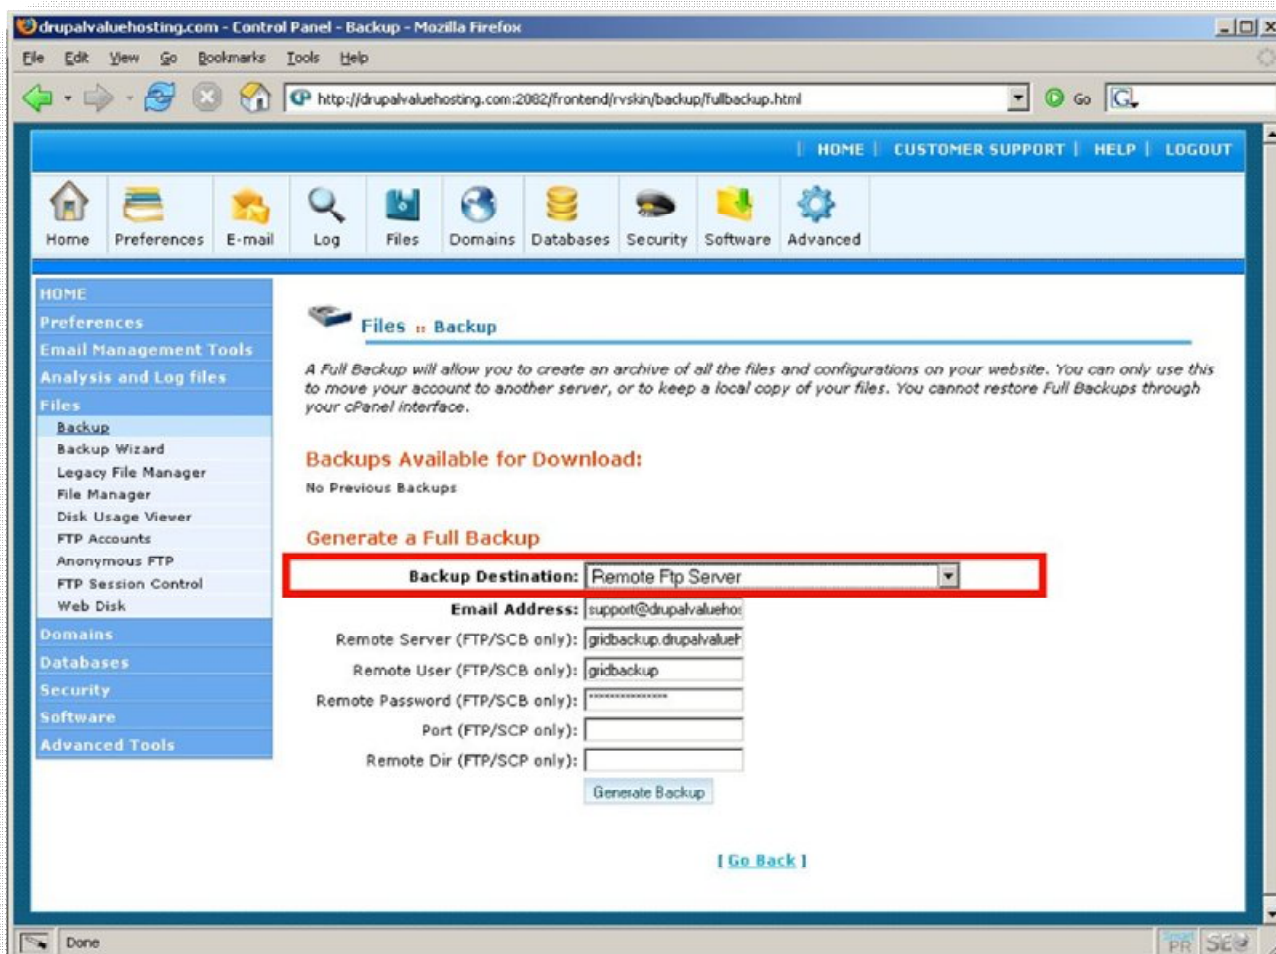

Step 2: Click on “Download or Generate a Full Backup”

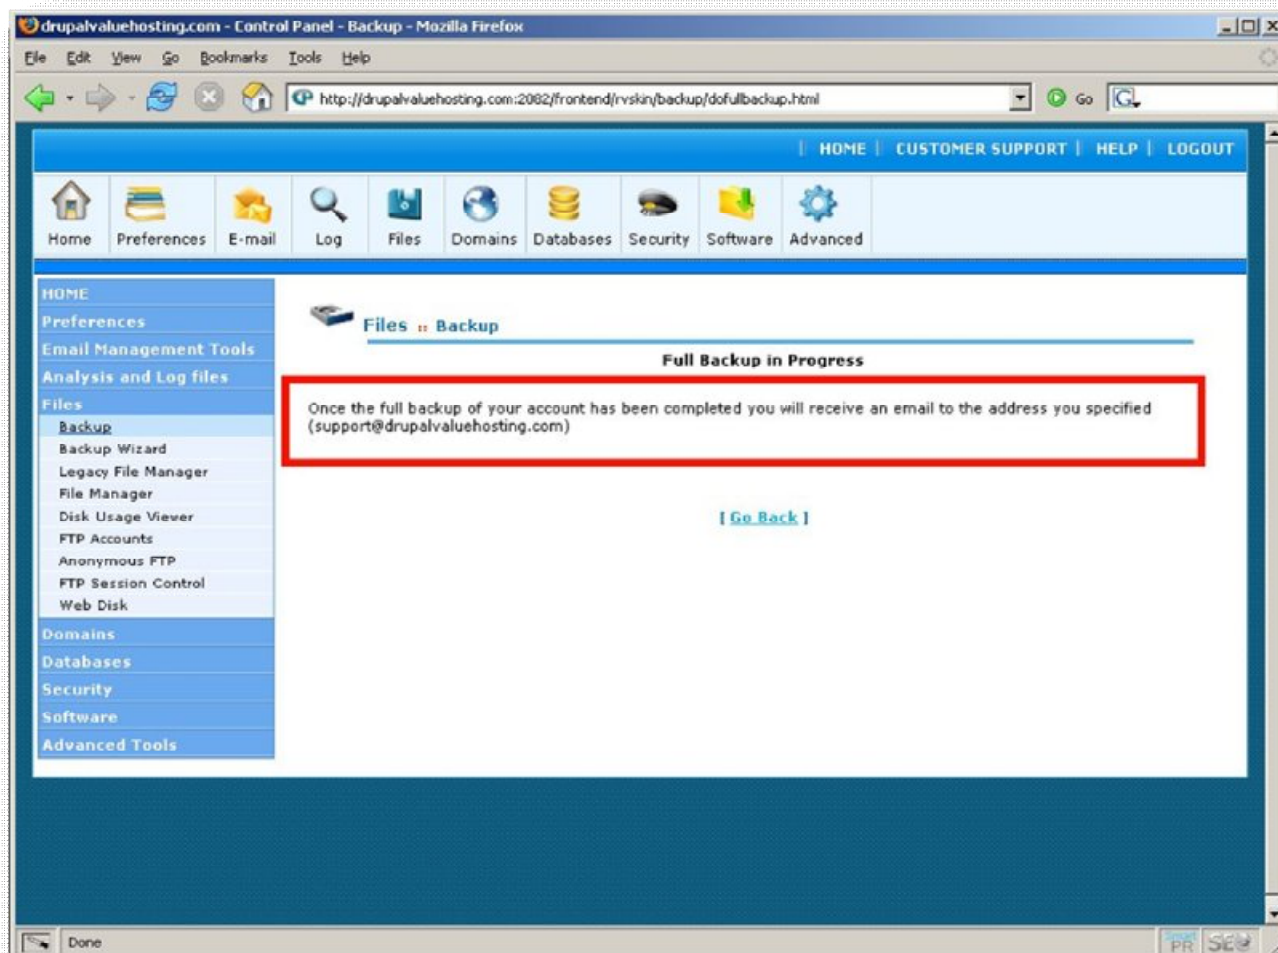

Step 3: Select the following configuration on the “Generate a Full Backup” form:

- ü Backup destination: “Remote FTP Server”
- ü Email Address: Your own email address where a confirmation will be sent
- ü Remote Server : “gridbackup.drupalvaluehosting.com”
- ü Remote User : “gridbackup”
- ü Remote Password : “DVH78323JUWNYTS”
- ü Click on “Generate Backup”

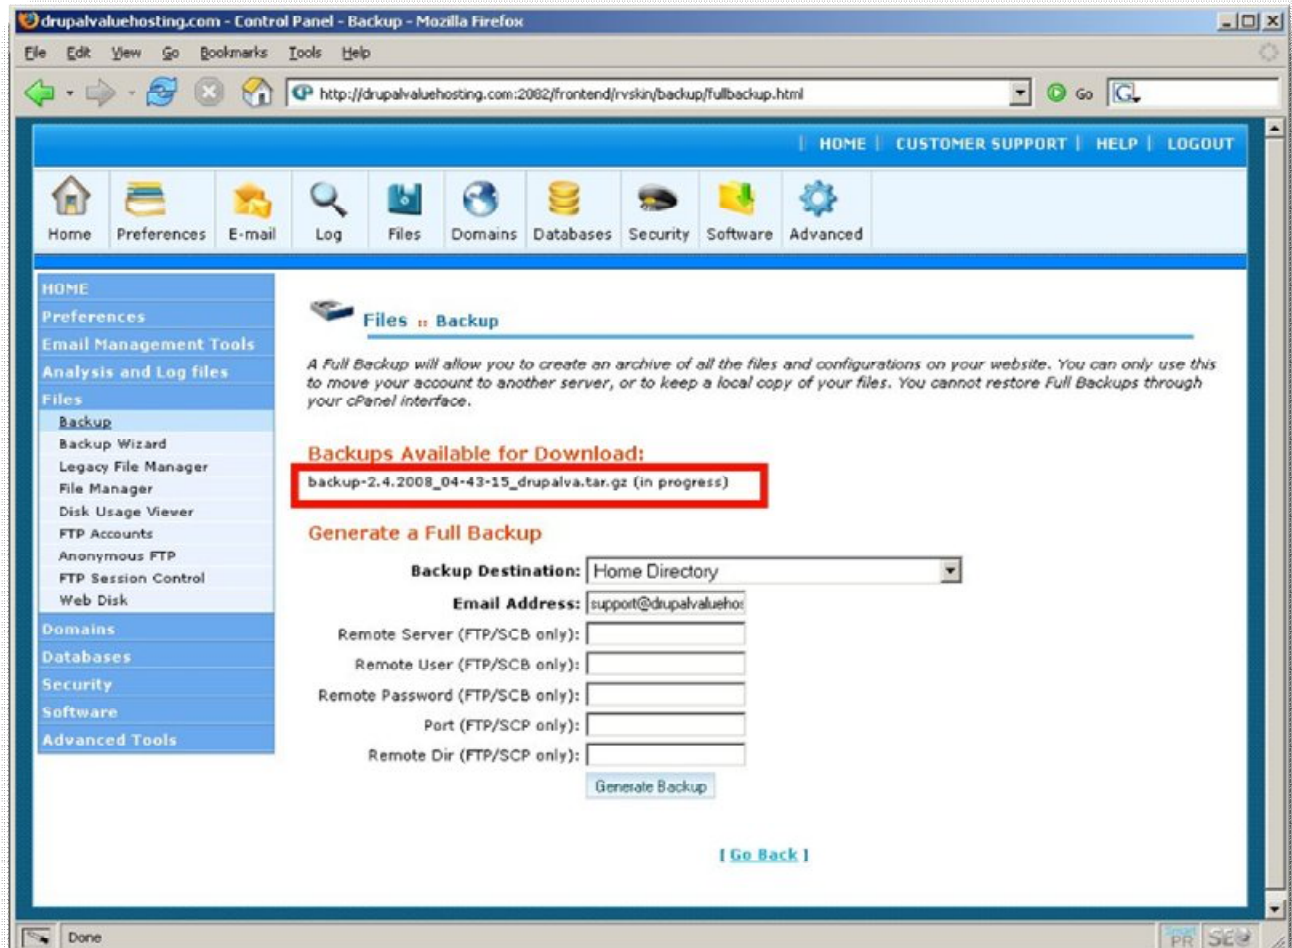

Step 4: You will see a “Full Backup in Progress” Screen >> Click on “Go Back”

Hint: You can now continue your other work, the backup will continue even if you close the browser

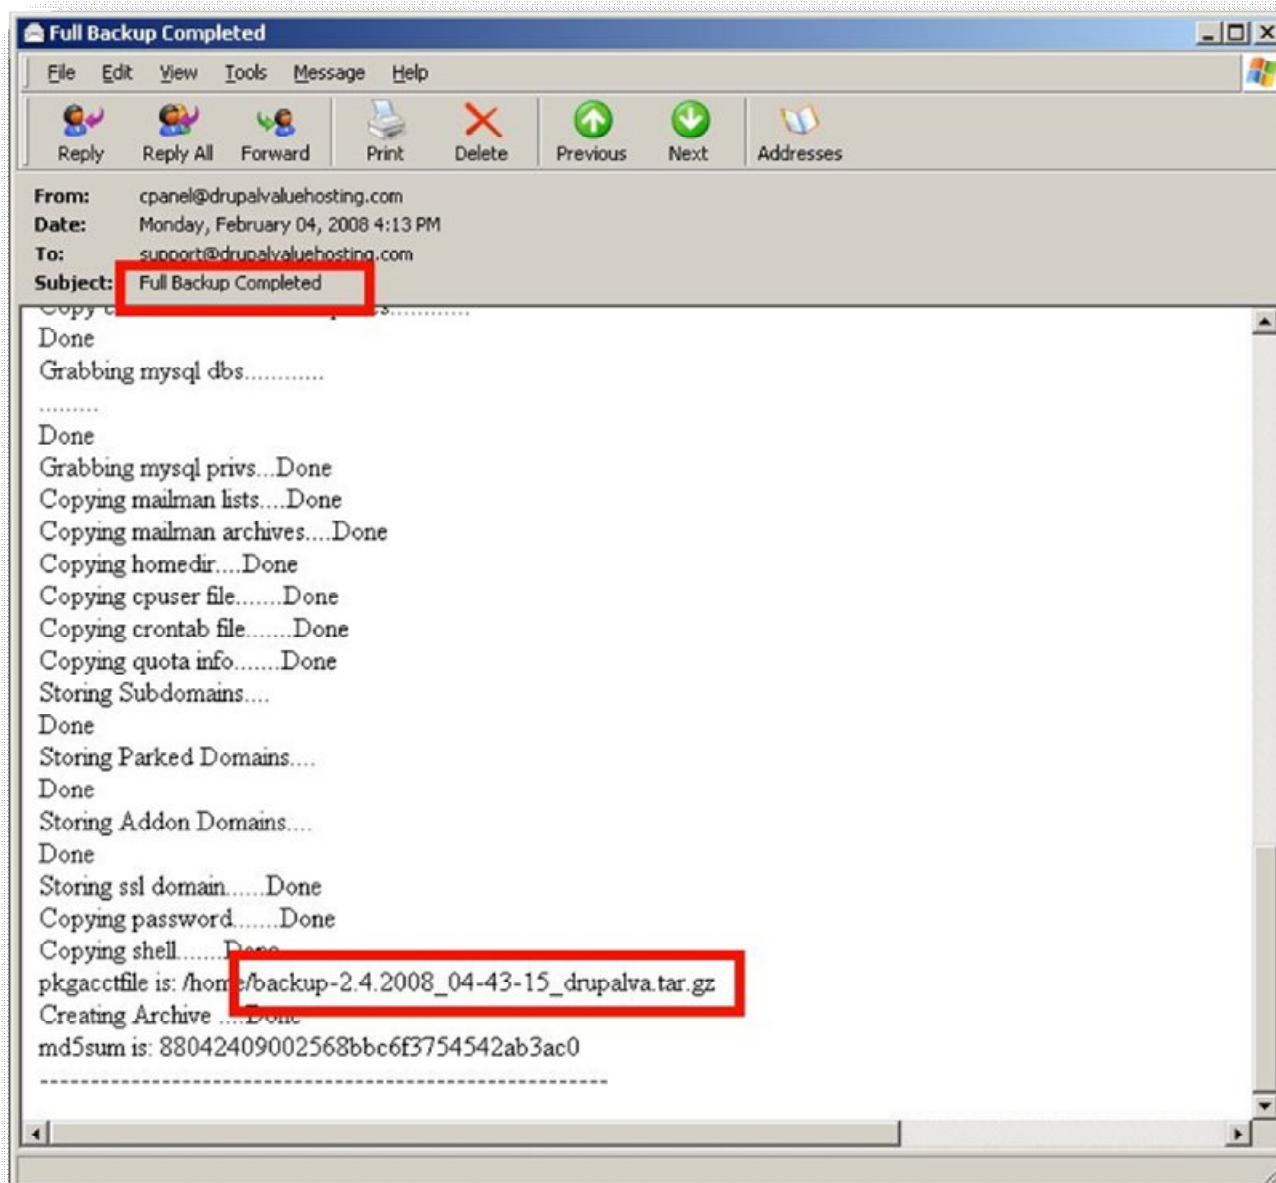

Step 5: If you clicked on “Go Back” in the step above you can see that the backup filename and the “in progress” status

Step 6 (Final Step): As soon as the backup is completed you will receive an email confirming the backup and the file name (save the filename for future reference)

This file is automatically mirrored and copied on RAID 5 disc arrays at both Dallas Data center and the Seattle Data Center

Fair Use Policy

- ü You can utilize the grid backup for two backup copies of your account in a single month
- ü The grid backup system will store only the last 3 backups of your account
- ü To ensure security and privacy of content, all backups undergo 256bit enterprise grade encryption and are accessible by the authorized DVH server staff only

Restoring Backups

1. When you want us to restore an account in case of any emergency or disaster, raise a Support Ticket providing your domain name and the name of the backup file on our Enterprise Grid
2. We will fetch the file from the secured storage area and restore the entire site. As Simple as That!

Hope you will benefit from this unique service. This is yet another initiative towards our commitment towards our valued customers at DVH. Please share your feedback at support@drupalvaluehosting.com

We always look forward to your emails J

Regards,
Amit Gupta
